

# VIKRAM SUNDARAM

Data Analyst | Reporting & Operations Analytics

vikramsundaram06@gmail.com | 9360159152 | Coimbatore, Tamil Nadu | [Portfolio](#)

---

## PROFESSIONAL SUMMARY

Results-driven, detail-oriented analyst with hands-on experience in data extraction, cleaning, and visualization using SQL, Excel, Python, and Power BI. Proven ability to pull insights from complex datasets, build KPI dashboards, and communicate findings clearly to both technical and non-technical stakeholders. Adept at supporting real-time decision-making in fast-paced operational environments, with a demonstrated track record of maintaining high-quality databases and delivering actionable business recommendations.

## CORE COMPETENCIES

SQL (Joins, Aggregations, Subqueries, Nested Queries, Data Extraction) • Advanced Excel (Pivot Tables, VLOOKUPS/XLOOKUPS, Dashboards)

Power BI (DAX, Data Modeling, Interactive Dashboards, KPIs) • Python (Pandas, Matplotlib, EDA) • KPI Development & Performance Metrics Tracking • Stakeholder Communication

Data Cleaning & Preprocessing • Trend Analysis & Forecasting • Customer Segmentation & Behavior Analysis

## PROFESSIONAL EXPERIENCE

**CADAmPs Technology** | **Web Marketing Analyst** | Sep 2024 – Present • Coimbatore, Tamil Nadu

- Managed and maintained lead databases in Excel with Pivot Tables and advanced functions, ensuring data accuracy and consistency across B2B outreach campaigns — directly aligned with multi-database management requirements.
- Tracked and reported key outreach metrics (emails sent, response rates, conversion performance), developing structured dashboards to communicate weekly findings and variances to management.
- Performed rigorous data validation and cleanup workflows to maintain high-quality records, supporting reliable reporting and data-driven decision-making.
- Researched and collected management-level contact data by querying multiple internal and external data sources, supporting data extraction and ad hoc analysis needs.
- Collaborated with internal stakeholders across operations and marketing teams to surface insights and provide real-time information flow to support timely business decisions.
- Supported website content accuracy and business information updates, demonstrating attention to detail and cross-functional communication skills.

## KEY PROJECTS

**Customer Behavior Analysis** | *Understanding Purchasing Patterns to Drive Business Decisions* Nov–Dec 2025

- Extracted and analyzed customer shopping data using SQL (joins, subqueries, aggregations) across multiple data sources to identify purchasing trends and high-value customer segments — mirroring ad hoc SQL reporting tasks.
- Performed end-to-end data cleaning, exploratory data analysis, and customer segmentation in Python (Pandas) and Excel to uncover key behavioral patterns.
- Built interactive Power BI dashboards to visualize revenue performance, product KPIs, and customer insights, presenting findings in review forums with clear narratives.
- Generated actionable business recommendations to improve customer retention and optimize marketing strategies, demonstrating ability to translate data into decisions.

**n8n AI Agent for Data Analysis** | *Automated Data Analysis Workflow using AI Agent* 2025

- Designed and built an end-to-end automated data analysis workflow using n8n, integrating a Gemini AI agent to interpret data, generate insights, and deliver analysis without manual intervention.
- Connected Google Sheets as the data source within the pipeline, enabling seamless ingestion, processing, and output of structured data through the AI agent.

- Implemented memory management within the AI agent to maintain context across multi-step analysis tasks, improving accuracy and continuity of generated insights.
- Demonstrated ability to leverage modern AI and automation tools to streamline data workflows — reducing manual effort and enabling faster, scalable decision support.

#### **Spotify Data Analysis** | *Analyzing Music Trends and Listener Preferences* Dec 2025

- Used SQL and Python to query and analyze large music datasets, identifying trends in song popularity, artist performance, and listener behavior.
- Developed Power BI dashboards and generated reports to communicate listening patterns and performance metrics to stakeholders.

## **EDUCATION**

---

### **Bachelor of Engineering — Computer Science and Engineering**

Hindusthan Institute of Technology, Coimbatore | Sep 2020 – May 2024

- Academic Project — Crop Recommendation System (Machine Learning): Built an ML model using soil, weather, and season data to generate data-driven crop recommendations, demonstrating analytical problem-solving and insights generation from structured datasets.

## **COURSES & TRAINING**

---

### **Data Analyst Course** — Besant Technologies, Chennai | Apr 2025 – Nov 2025

- Trained in SQL, Python, Excel, Tableau, and Power BI with hands-on project-based learning across data extraction, analysis, visualization, and dashboard development.

## **CERTIFICATIONS**

---

**SQL (Oracle Database):** Comprehensive training in data definition, data manipulation, joins, nested queries, and query optimization — directly aligned with BA role requirements.

**Python:** Hands-on training in data types, control structures, functions, file handling, and data analysis with Pandas.

**Excel & Advanced Excel:** Pivot Tables, VLOOKUP/XLOOKUP, formulas, data cleaning, and dashboard creation.

**Power BI:** Dashboard creation, data modeling, Power Query, DAX basics, KPIs, and interactive reporting.
